

BriteGrip

**Exceptional anti-skid properties
to increase road safety in all
weather conditions**

Key benefits

- Exceptional anti-skid properties in both wet and dry conditions
- Easily applied to a range of surfaces
- Available in a wide range of colours
- Fast drying, roads can be opened in less than 30 minutes after application.

Applications

BriteGrip is applied directly onto surfaces with simple, low-cost equipment. This makes it the ideal solution for a range of projects, including:

- Heavily trafficked surfaces
- Braking zones
- Dangerous bends
- Steep inclines
- Bridge decks, including metal joints

BriteGrip is available in a range of traffic colours, from

kelly-bros.com

**A solution from
one of the
industry's most
trusted names**

Founded in 1972, Kelly Bros International develops and manufactures high quality products that help reduce hazards and danger on the roads, and ultimately saves lives.

We are one of the industry's foremost manufacturers and we are a trusted supplier to authorities and agencies worldwide. All our products are manufactured in our sustainable manufacturing plant.

Simple application

Mix using a simple battery-operated drill and mixing paddle.

Quickly and easily apply BriteGrip using a long-pile paint roller to ensure a rough surface finish with spikes of up to 3mm. This provides excellent anti-skid properties in all weather conditions.

High-friction performance

BriteGrip's durable composition makes it the ideal solution for heavily trafficked surfaces, braking zones and other potentially low-grip surfaces like steep bends or inclines.

Offering exceptional anti-skid properties in all-conditions, BriteGrip is the smarter choice for even the most challenging of settings.

Rapid reopening

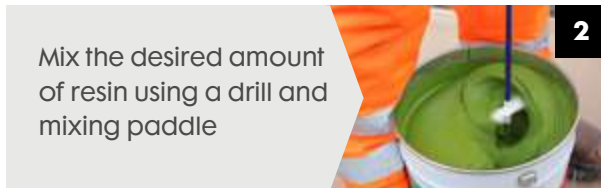

Quick and easy to apply, this fast-drying solution means roads can be reopened rapidly with minimal disruption to traffic. The high quality nature of this specially designed resin means you will have a long lasting durable marking for years to come.

How to use

1
Clean the area for repair thoroughly and mask with tape if needed.

2
Mix the desired amount of resin using a drill and mixing paddle

3
Distribute resin using a squeegee

4
Use a long-pile roller to create excellent anti-skid properties

5
Once fully dry, edge markings or lettering can be applied to the surface

6
Roads can be reopened quickly
